

OPTILOCK

Protection for glass sliding doors

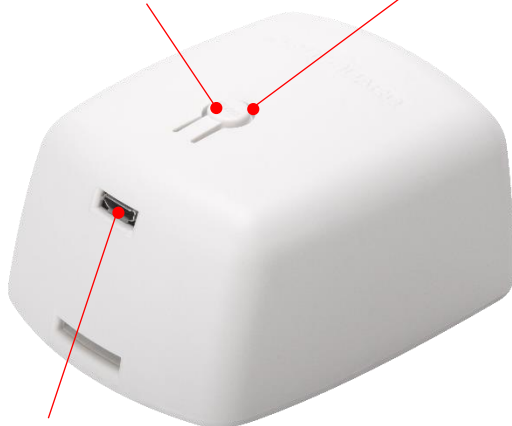

FEATURES AND BENEFITS OF THE PRODUCT

- Mechanical and electronic protection for glass sliding doors of up to 8 mm in thickness. The distance between the panes should be minimum 7 mm.
- Quick and easy installation by personnel – without using tools, stickers and drilling.
- Automatic locking of the OptiLock – one does not have to remember to lock it using a remote control.
- Universal USER remote control for controlling all cabinets protected by the OptiLocks.
- Long battery life – up to 2 years of using without the necessity to replace it frequently.
- Symmetrical shape – universal for both left and right doors.

FUNCTIONS OF THE OPTILOCK

The „Press” button wakes the device up from the sleep mode. The sleep mode of the OptiLock increases the battery lifetime.

LED indicating the operating status of the protective system.

Micro-USB port allows using a standard 5V smartphone charger in case the battery gets discharged and opening the lock in the safe mode.

The „Reset” button allows adding and deleting remote controls from the memory of the OptiLock.

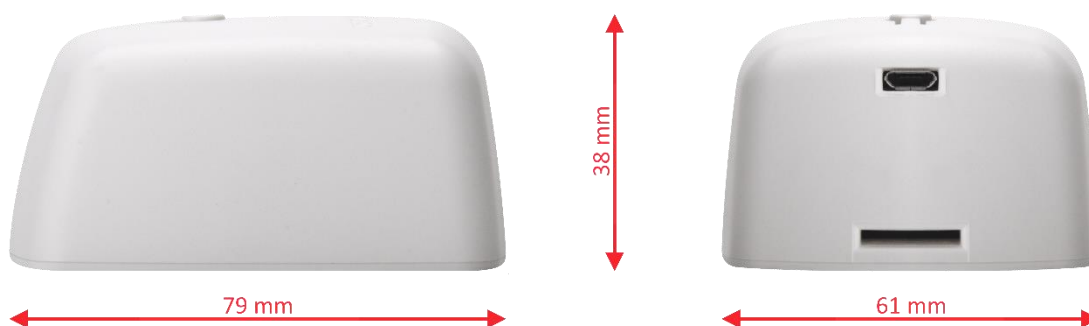

Long battery life – up to 2 years of using without the necessity to replace it frequently.

The loudspeaker acoustically indicates the operating status of the protective system. The sound level is 85 dB.
